

SE- Introduction to Web Technologies - HTML and CSS

Session 7: Flexbox & Grid
Coverage: CSS Flexbox (container, justify, align) and Grid (template columns & rows).
Demo: Responsive gallery of social icons.

Task :

Question :- 1

Create an HTML file with a container div and 4 images of your favorite apps (Instagram, WhatsApp, Zomato, Spotify) as social icons. Use CSS Flexbox to display them in a row with equal spacing using justify-content.

Ans:-

```
<!DOCTYPE html>

<html>

<head>

  <title>Social Icons</title>

  <style>

    .container{

      display: flex;

      justify-content: space-evenly;

      margin-top: 50px;

      border: 1px solid black;

    }

    .container img{

      width: 80px;

      height: 80px;
```

```
    }  
  </style>  
</head>  
<body>  
  <div class="container">  
      
      
      
      
  </div>  
</body>  
</html>
```

Question :- 2

Build a horizontal playlist bar like Spotify using Flexbox: add 5 song cards with song name and artist, and use align-items to vertically center the text in each card.

Ans:-

```
<!DOCTYPE html>  
<html>  
<head>  
  <title>Spotify Playlist</title>  
  <style>  
  
    .playlist{  
      display: flex;  
      gap: 15px;  
    }  
  </style>  
</head>  
<body>  
  <div class="playlist">  
    <div>Song 1</div>  
    <div>Song 2</div>  
    <div>Song 3</div>  
    <div>Song 4</div>  
    <div>Song 5</div>  
  </div>  
</body>  
</html>
```

```
.song{
  width: 180px;
  height: 80px;
  border: 1px solid black;
  display: flex;
  align-items: center;
  justify-content: center;
}

</style>
</head>
<body>
  <div class="playlist">
    <div class="song">Believer - Imagine Dragons</div>
    <div class="song">Shape of You - Ed Sheeran</div>
    <div class="song">Perfect - Ed Sheeran</div>
    <div class="song">On My Way - Alan Walker</div>
    <div class="song">Closer - Chainsmokers</div>
  </div>
</body>
</html>
```

Question :- 3

Design a Flipkart-style product grid: create a section with 6 product cards (use placeholder images and product names), and use CSS Grid to arrange them in 3 columns and 2 rows.

Ans:-

```
<!DOCTYPE html>

<html>

<head>

  <title>Flipkart Product Grid</title>

  <style>

    .grid{

      display: grid;

      grid-template-columns: repeat(3, 1fr);

      gap: 20px;

    }

    .card{

      border: 1px solid black;

      padding: 10px;

      text-align: center;

    }

    .card img{

      width: 100%;

    }

  </style>

</head>

<body>

  <div class="grid">

    <div class="card">

      

      <h3>Laptop</h3>

    
```

</div>

<div class="card">

<h3>Mobile</h3>

</div>

<div class="card">

<h3>Headphones</h3>

</div>

<div class="card">

<h3>Keyboard</h3>

</div>

<div class="card">

<h3>Mouse</h3>

</div>

<div class="card">

<h3>Monitor</h3>

</div>

</div>

</body>

</html>

Question :- 4

Make your product grid responsive: use grid-template-columns to show 3 columns on desktop, 2 columns on tablet, and 1 column on mobile screens.

Hint: Use CSS media queries to change grid-template-columns based on screen width.

Ans:-

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>task 4</title>

  <style>

    .grid{

      display: grid;

      grid-template-columns: repeat(3, 1fr);

      gap: 20px;

    }

    .card{

      border: 1px solid black;

      text-align: center;

      padding: 10px;

    }

    img{

      width: 100%;

    }
```

```
@media(max-width:768px){
    .grid{
        grid-template-columns: repeat(2,1fr);
    }
}

@media(max-width:480px){
    .grid{
        grid-template-columns: repeat(1,1fr);
    }
}

</style>
</head>
<body>
<div class="grid">
    <div class="card">
        
        <h1>Laptop</h1>
    </div>
    <div class="card">
        
        <h1>tablet</h1>
    </div>
    <div class="card">
        
        <h1>mobail</h1>
    </div>
</div>
```

```
<div class="card">

  

  <h1>headphone</h1>

</div>

<div class="card">

  

  <h1>monitor</h1>

</div>

<div class="card">

  

  <h1>mouse</h1>

</div>

</div>

</body>

</html>
```
